

Specific Requirements for MC Certification

1. Successful completion of the Natural Family Planning Medical Consultant Course(EP1 and EP2)
2. Providing written assurance of willingness to abide by the Academy's Code of Ethics.
3. Documentation of Continuing Education approved by the Academy. This requirement has been updated to assure that the Continuing Education provides up-to-date information regarding NaProTechnology.
4. Assessment of the application of NaProTechnology in your medical practice. This will be done by peer review of at least 10 patients you have treated who are charting with the Creighton Model FertilityCare System. The peer review will assess whether you have appropriately applied principles of cooperative management of fertility and NaProTechnology in treating these patients.
5. Documentation of a supportive relationship with a FertilityCare Practitioner. This will be assessed by means of a standardized recommendation form from a FertilityCare Practitioner with whom you work.
6. For initial certification, assurance of understanding of the FertilityCare education process by documenting that you have directly observed a number of follow-up sessions conducted by a FertilityCare Practitioner (either 5 follow-up sessions, 1 introductory session, and 1 pregnancy evaluation, OR 10 follow-up sessions).
7. Successful completion of a certification examination as a FertilityCare Medical Consultant. This is a separate examination from the final examination of the Natural Family Planning Medical Consultant course and is only required for the initial certification, not for renewals.
